

Environmental Statement

The Tallis Choral Foundation recognises that we have a responsibility to minimise our environmental impact while enriching lives through music.

We will endeavour to:

- Reduce unnecessary travel by encouraging regional collaboration and the appropriate use of online meetings.
- Minimise waste through the use of digital communications and electronic music where appropriate.
- Work with venues and partners who share our commitment to environmental sustainability.
- Source goods and services responsibly wherever possible.
- Encourage members, audiences and supporters to consider sustainable travel options when attending our events.

As the Foundation grows, we will continue to review our practices and identify new opportunities to support a more environmentally sustainable future for the performing arts.
